PRODUCT USE STATEMENT: This seed is a blend of 5% Hybrid Pro and 95% Seed containing the Herculex I Insect Protection gene which produces a Bt (Bacillus thuringiensis) cry1Ab protein and the YieldGard Corn Borer gene which produces a Dl-1 Cry protein. These proteins provide protection against European corn borer, southwestern corn borer, fall armyworm, corn earworm, and sugar cane borer. This product is intended for planting in an area that has a history of European corn borer or southwestern corn borer. The use of this product may require additional labeling or restrictions under state law. Contact state regulatory agencies for information.

NOTICE: See important LibertyLink Product Use Information on back of tag.
SOUTHERN CORN/COTTON GROWING AREAS MUST FOLLOW THE REFUGE REQUIREMENTS DESCRIBED BELOW AND IN THE PRODUCT USE GUIDE PRIOR TO PLANTING. NO ADDITIONAL REFUGE IS NEEDED IN THE NON-COTTON GROWING AREAS:

- Refuge must be at least 20% in Southern Corn/Cotton-Growing Areas and must be planted within 1/2 mile of the Bt corn borer resistant hybrid
- Refuge block or strips must be ≥ 4 rows
- Refuge hybrid must not express a Bt protein active against corn borer

NON-COTTON GROWING AREAS: Foliar insecticide treatments for control of European corn borer, corn earworm, southwestern corn borer, fall armyworm, black cutworm, western bean cutworm, lesser corn stalk borer, southern corn stalk borer, and sugarcane borer may be applied only if economic thresholds are reached for one or more of these target pests. Foliar insecticide treatments are also permitted for control of corn rootworm adults if economic thresholds are reached.

SOUTHERN CORN/COTTON GROWING AREAS: Foliar insecticide treatments for control of European corn borer, corn earworm, southwestern corn borer, fall armyworm, black cutworm, western bean cutworm, lesser corn stalk borer, southern corn stalk borer, and sugarcane borer may be applied only if economic thresholds are reached for one or more of these target pests. In addition, the refuge can be protected from CRW damage by an appropriate seed treatment or soil insecticide; however, insecticides labeled for adult CRW control must be avoided in the refuge during the period of CRW adult emergence.

Microbial Bt insecticides must not be applied to non-Bt corn refuge plants.

Cotton-Growing Areas are all the counties in:
- AR, LA, MS, AL, GA, FL, SC, NC and IN
- MO counties of Dunklin, New Madrid, Pemiscot, Scott and Stoddard
- OK counties of Beckham, Caddo, Comanche, Custer, Greer, Harmon, Jackson, Kay, Kiowa, Tillman and Washita
- TN counties of Carroll, Chester, Crockett, Dyer, Fayette, Franklin, Gibson, Hardeman, Hardin, Haywood, Lake, Lauderdale, Lincoln, Madison, Obion, Rutherford, Shelby and Tipton
- TX counties except Carson, Dallam, Hansford, Hartley, Hutchinson, Lipscomb, Moore, Ochiltree, Roberts and Sherman
- VA counties of Dinwiddie, Franklin City, Greensville, Isle of Wight, Northampton, Southampton, Suffolk City, Surry and Sussex
