

INTERACTION SWITCHGRASS HARVEST STRIPS

- All plots (EXCEPT PLOT 9) are harvested in from the west at 51 feet center of harvester. Plot 9 is harvested at 31 feet in from the west side of plot. GPS lines are used for harvest.
- GPS lines are set up from previous planting labeled as planting row 1, planting row 2, planting row 3, planting row 4.
- Row 1 plots (1-4)
- Row 2 plots (5-8)
- Row 3 plots (9-12)
- Row 4 plots (13-16)
- GPS line for PLOT 9 in the GPS is Harvest strip 31'
- Set up equipment on GPS as 7330 tractor and 7.5 kemper head as implement.
- TRACK SPACING MUST BE AT 7.5 feet
- Must line up on correct row on GPS to take correct harvest strip. ROWS ARE AS LABELED.
- ROW 1 Use GPS Track Planting Row 1 and Line up on GPS Row 8 to center at 51 feet
- ROW 2 Use GPS Track Planting Row 2 and Line up on GPS Row 7 to center at 51 feet
- Row 3 Use GPS Track Planting Row 3 (PLOTS 10-12) and Line up on GPS Row 6 to center at 51 feet
- Row 3 (PLOT 9) Use GPS Track Harvest 31' and Line up on GPS Row 0 to center at 31'
- Row 4 Use GPS Track Planting Row 4 and Line up on GPS Row 8 to center at 51'
- All Plots (EXCEPT PLOT 5&13) were harvested South to North. Plots 5&13 were harvested North to South due to irrigation riser on the south end of the harvest strip.
