

G7: Perennial Grass – Multi-species	
Site	KBS
Planting	None
	Planted in 2008 and overseed in June 2009 because of poor establishment in 2008.
Cover Crop	None
Tillage	None
Harvest	Same as G5, G6, G9, and G10
	Harvest so that 6 inches of stubble remain for wildlife cover. Harvest in fall after hard frost / senescence.
Fertilization	Nitrogen will be applied at 50 lb N acre ⁻¹ (56 kg N ha ⁻¹) No P or K in 2010
Pest Cntrl	None:
	Drive herbicide in not labeled for Canada wild rye.
Microplots	No-Nitrogen: No N fertilizer applied to west 15 feet of plot (except east 15' for block 1 of KBS to avoid gas chambers).
	Arlington
	None
	None
	None
	Same as G5, G6, G9, and G10
	Harvest so that 6 inches of stubble remain for wildlife cover. Harvest in fall after hard frost / senescence.
	Nitrogen will be applied as ammonium nitrate (34-0-0) at 50 lb N acre ⁻¹ (56 kg N ha ⁻¹) No P or K in 2010
	None
	No-Nitrogen: No N fertilizer applied to west 15 feet of plot. Compare yield to opposite plot edge.
